

Cross Reference by Part Number

In the following pages are listed thousands of competitive filter manufacturers and original equipment part numbers, in numeric-alpha order. Simply locate your part number (ignore initial zeros, dashes, and periods). The Fleetguard part number is then referenced, along with a code to the competitive manufacturer. A listing of codes and manufacturer's names follows immediately. Always verify the manufacturer's name to assure that the cross reference is correct, as numbers may be duplicated by different manufacturers.

For part numbers not listed in this section, please visit www.cumminsfiltration.com or contact your local Cummins Filtration office.

Correspondances par numéro de pièce

Dans les pages qui suivent, vous trouverez une liste comportant des milliers de numéros de pièces de fabricants de filtres concurrents et de constructeurs, répertoriés par ordre alphanumérique. Il vous suffit de chercher la référence (ne tenez pas compte du zéro initial, des tirets et des points). Le numéro de pièce Fleetguard est indiqué, avec à droite une abréviation du nom du fabricant. Vous trouverez en fin de rubrique une liste donnant les abréviations et noms des fabricants. Vérifiez toujours le nom du fabricant, pour vous assurer que la correspondance est bonne, les mêmes numéros pouvant être utilisées par différents fabricants.

Si les numéros des pièces que vous recherchez n'apparaissent pas sous cette rubrique, veuillez consulter www.cumminsfiltration.com ou prendre contact avec votre centre de distribution Cummins Filtration local.

Querverweis anhand der Bauteilnummer

Auf den folgenden Seiten finden Sie eine Liste von Herstellern und Bauteilnummern (Originalprodukte) in alphanumerischer Reihenfolge. Machen Sie Ihre Bauteilnummer ausfindig (erste Nullstelle, Punkte und Bindestriche können ignoriert werden). Die Fleetguard-Bauteilnummer wird dann gemeinsam mit dem Code anderer Hersteller angezeigt. Unmittelbar darauf folgt eine Liste von Codes und Herstellernamen. Bitte überprüfen Sie den Herstellernamen um sicherzustellen, dass es sich um den richtigen Querverweis handelt, da es vorkommt, dass von verschiedenen Herstellern dieselbe Bauteilnummer verwendet wird.

Falls Sie Ihre Bauteilnummer nicht in diesem Abschnitt finden können, besuchen Sie bitte www.cumminsfiltration.com oder wenden Sie sich an Ihren Cummins Filtration-Vertreter vor Ort.

Referencia cruzada por número de pieza

En las páginas siguientes, hallará una lista de miles de referencias de fabricantes de filtros competitivos y de números de piezas de equipo original, por orden alfanumérico. Basta buscar su número de pieza (sin tener en cuenta el cero inicial ni los guiones y puntos). Encontrará la correspondencia Fleetguard con un código del nombre del fabricante de la competencia. A continuación, encontrará una lista de los códigos y de los nombres de fabricantes. Siempre debe verificar el nombre del fabricante a fin de cerciorarse de que se trata de la referencia cruzada correcta, puesto que varios fabricantes podrían utilizar un mismo número para los productos.

Si el número de pieza que busca no se halla en este apartado, visite www.cumminsfiltration.com o póngase en contacto con la oficina Cummins Filtration más cercana.

Riferimenti incrociati in base al numero di parte

Le pagine che seguono contengono i nomi di migliaia di fabbricanti di filtri concorrenti ed i numeri di parte originali, in ordine alfanumerico. Trovare il numero desiderato (trascurare zero iniziali, trattini e punti). Si fa inoltre riferimento al numero di parte Fleetguard, unitamente ad un codice dei prodotti concorrenti ed al nome del fabbricante. Controllare sempre il nome del fabbricante per accertarsi che il riferimento incrociato sia corretto, poiché i numeri possono essere duplicati da fabbricanti diversi.

Per i numeri di parte non elencati in questa sezione, andare a www.cumminsfiltration.com o consultare l'ufficio Cummins Filtration di zona.

Localização do número de peça correspondente

Nas páginas seguintes se encontram listados milhares de filtros fabricados por nossos concorrentes e números de peças originais em ordem alfa-numérica. Localize o número de seu filtro (ignore zeros no começo, traços e pontos). O número do filtro Fleetguard estará relacionado junto com o código do filtro do nosso concorrente. Uma lista de códigos e nome de fabricantes segue imediatamente. Devido a possibilidade de duplicação de número das peças por diferença fornecedores, verifique sempre o nome do fabricante para certificar-se de que a referência é correta.

Para obter informações sobre números de peças que não se encontram listadas nesta seção, visite o site www.cumminsfiltration.com ou entre em contato com seu escritório local da Cummins Filtration.

Referentielijst op onderdeelnummer

Op de volgende pagina's staan duizenden concurrerende filterfabrikanten en OE-onderdeelnummers (originele uitrusting), in alfabetische volgorde. Zoek uw onderdeelnummer (beginnullen, streepjes en punten negeren). U vindt daarachter een verwijzing naar het Fleetguard onderdeelnummer en de code van de concurrerende fabrikant. Controleer altijd met behulp van de navolgende codelijst voor fabrikantnamen de naam van de fabrikant, om er zeker van te zijn dat de verwijzing juist is, want dezelfde nummers kunnen door verschillende fabrikanten gebruikt worden.

Voor onderdeelnummers die niet in de lijst zijn opgenomen, kunt u terecht op www.cumminsfiltration.com of contact opnemen met uw plaatselijke Cummins Filtration-kantoor.

部件编号对照

以下数字中以数字字母为顺序，列出了数千个滤清器竞争厂家和原始设备制造商 (OEM) 的部件编号。只需找到您的部件编号（忽略前面的零、连字符和点号）。然后就可与 Fleetguard 的部件编号进行对照，同时还可查看相应竞争厂家的代码。部件编号后紧跟着代码和厂家名称列表。由于不同厂家可能使用相同的部件编号，所以请记住验证厂家名称是否正确，以确保部件编号对照准确无误。

对于此处未列出的部件编号，请访问 www.cumminsfiltration.com 或联系您当地的 Cummins Filtration 办事处。

部品番号によるクロス・リファレンス

次のページには、何千もの競合するフィルター製造業者とそのオリジナル装置の部品番号一覧がアルファベット順に記載されています。目的の部品番号を探してください(先頭のゼロ、ダッシュ、およびピリオドは無視してください)。Fleetguardの部品番号が、競合する製造業者のコードと共に参照できます。Fleetguardの部品番号のすぐ後に、コードと製造業者名が記載されています。番号が他の製造業者のものと同様である場合があるので、必ず、製造業者名を確認して、クロス・リファレンスが正しいことを確認してください。

このセクションに記載されていない部品番号については、www.cumminsfiltration.com をご覧になるか、最寄りのCummins Filtrationオフィスまでお問い合わせください。

부품 번호별 상호 참조

다음 페이지에는 수천 곳의 경쟁 필터 제조업체와 원 장비의 부품 번호가 숫자-알파벳 순으로 나열되어 있습니다. (첫머리의 0, 대시, 점을 무시하고) 간편하게 부품 번호를 찾으십시오. 그런 다음, 경쟁 제조업체 코드와 함께 Fleetguard 부품 번호를 참조하십시오. 코드와 제조업체 이름이 즉시 나열됩니다. 제조업체들이 동일한 부품 번호를 사용할 수도 있기 때문에, 항상 제조업체의 이름을 확인하여 상호 참조가 올바른지 확인하십시오.

본 절에 나열되지 않은 부품 번호는 www.cumminsfiltration.com 을 방문하거나 가까운 Cummins Filtration 사무실에 문의 바랍니다.

Перечень перекрестных ссылок по номеру части

На следующих страницах в буквенно-цифровом порядке приводятся тысячи конкурирующих производителей фильтров и номера частей оригинального оборудования. Достаточно найти нужный номер части (не обращайте внимания на нули, тире и точки в начале). Затем указывается ссылка на номер части Fleetguard, а также код конкурирующего производителя. Далее приводится перечень кодов и наименований изготовителей. Всегда проверяйте наименование производителя, чтобы гарантировать правильность перекрестной ссылки, поскольку номера могут дублироваться у разных производителей.

Сведения о номерах частей, приведенных в этом разделе, см. на сайте www.cumminsfiltration.com или получите их в региональном представительстве компании Cummins Filtration.

D. CROSS REFERENCE BY PART NUMBER MANUFACTURER INDEX

Following is a list of all manufacturer's abbreviated names used in the Number Finder Cross Reference. You should always verify the manufacturer's name to assure accuracy of your cross reference.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" determinations in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3332; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

Table with 10 columns: MFRS.MODEL, OUR NO. MFR, and 8 additional columns. It lists various part numbers and their corresponding models across different manufacturers.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

Table with columns: MFRS.MODEL, OUR NO. MFR, and 8 columns of cross-referenced part numbers. Includes various model numbers like AF305, AS2450, LF509N, and AF437K.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

 1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Poly

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF1333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

Page D180 1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polyethylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Supertiter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross. Page D223

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determination in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determination in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polyethylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polyethylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross. Page D239

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determination in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3335; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross. Page D267

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

Table with 8 columns: MFRS.MODEL, OUR NO. MFR, MFRS.MODEL, OUR NO. MFR, MFRS.MODEL, OUR NO. MFR, MFRS.MODEL, OUR NO. MFR, MFRS.MODEL, OUR NO. MFR. Contains cross-reference data for various part numbers across multiple columns.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

				Upgrade: FS1293				FG132	FF109 LKHD

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determination in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

									Upgrade: LF9667
									Upgrade: LF3379

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polyethylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins K1V-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Polypropylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnorm element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Supertiter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' determinations in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Polypropylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER
